ABHAY VERMA

Lucknow, U.P., India · +91-8756782835 · abhayvermajune5@gmail.com
linkedin.com/in/abhay-verma-b3987a210 · github.com/ABHAY-05 · Portfolio

TECHNICAL SKILLS

Languages: Python, C++, TypeScript, JavaScript, SQL (MySQL)

Frontend: Next.js, React, Redux, Tailwind CSS, HTML5, CSS3, Framer Motion

Backend & Databases: Node.js, Express.js, FastAPI, Flask, MongoDB, Mongoose, Socket.IO

ML & Tools: TensorFlow, OpenCV, Git, REST APIs, VS Code, Postman, Jupyter

Core Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, System Design

WORK EXPERIENCE

Freelance Software Engineer Remote

Client: A&P Buyers Agency – Australia *Apr 2025 – Jul 2025*

- Architected a responsive real estate consulting platform using **Next.js 15**, **TypeScript**, and **Tailwind CSS**.
- Optimized web asset pipelines and video hero fallbacks utilizing `next-seo` to enhance cross-device loading efficiency and search rankings.
- Built interactive client UI features including testimonial carousels, dark/light themes, and instant booking forms with **Framer Motion** and **Embla Carousel**.

Freelance Software Engineer Remote

Client: PolarVeda (EdTech) – India *Jul 2024 – Dec 2024*

- Developed an online tutoring web platform using **Next.js**, **MongoDB**, and **Tailwind CSS** serving structured course modules.
- Structured scalable **MongoDB** database schemas to support concurrent user registrations, course cataloging, and interactive tutoring workflows.
- Designed accessible frontend interfaces tailored for real-time video playback and interactive online learning workflows.

PROJECTS

MedScan – AI Diagnostic Web Platform | *FastAPI, Python, TensorFlow, React, Tailwind CSS*

- Developed an AI diagnostic application utilizing 3 computer vision models for real-time pneumonia, ocular, and skin disease detection.
- Integrated **TensorFlow** deep learning models with an asynchronous **FastAPI** REST API backend to process user image classification requests.
- Built a responsive **React** dashboard providing instant AI-driven diagnostic reporting and secure medical image uploads.

Linguistic – Multi-Modal Vision & Text Engine | *Python, TensorFlow, OpenCV, Flask, Bootstrap*

- Collaborated in a 5-member engineering team to design computer vision pipelines for handwriting recognition, captcha decoding, license plate extraction, and translation.
- Deployed model microservices via a lightweight **Flask** REST API backend handling multi-format image inputs.

CODING PROFILE & ACHIEVEMENTS

LeetCode: Solved **800+** Data Structures and Algorithms problems.

GeeksforGeeks: Solved **350+** coding challenges focusing on core algorithms.

HackerRank: Achieved **6-Star Rating** in Problem Solving and **5-Star Rating** in Python.

EDUCATION

Pranveer Singh Institute of Technology Kanpur, India

Bachelor of Technology in Computer Science and Engineering *2020 – 2024*

Georgians Academy Shikohabad, India

Intermediate (CBSE) *2018 – 2019*

CERTIFICATIONS

Infosys: Data Structures and Algorithms using Python · Programming Fundamentals using Python Part 1 & 2

HackerRank: Problem Solving (Intermediate) · Python (Basic)
